One-of-a-Kind Designs from EcoChic Lifestyles

EcoChic Lifestyles founder Megan Risdon

EcoChic Lifestyles is a new line of interior and outdoor furniture made from reclaimed tropical fishing boats salvaged from tsunamis in Southeast Asia. EcoChic is helping clean up the coasts with its beautiful line of reclaimed wood furnishings.

Founded by Megan Risdon, a dedicated vegan and yogi, EcoChic Lifestyles offers its discriminating clients vivid, inviting furnishings that evoke the company's edict to do well by doing good.

Local sourcing and manufacturing provide jobs and resources to the Southeast Asian communities where Megan first hit upon the idea of EcoChic Lifestyles.

EcoChic Lifestyles is a perfect fit for people seeking eco-friendly, distinctive lifestyle. Retaining much of its original colorful paint, and weathered by waves, salt and sand, no two slabs of reclaimed boat wood are alike, so no two pieces of EcoChic Lifestyles furniture are ever the same. Carefully sanded by expert craftsmen to reveal a rainbow of glorious colors peeled away from a rich and colorful past life spent at sea, the resulting furniture is highly durable and water-resistant, finished with an organic, semi-gloss outdoor varnish. Each EcoChic piece is designed and finished in the US, in Southern California.

Visit the company's online store www.wearecochic.com and you'll discover chairs, barstools and benches; coffee, dining and communal tables; cabinets, consoles and shelving units; daybeds; decorative room dividers; mirrors; clothing racks; and a full collection of outdoor and pool area furniture. Or dream up your own piece — if it can be imagined, it can be made — salad servers, decorative boxes, guitar capos, headboards, flooring, dressers, etc...EcoChic Lifestyles can build it for you.
